Kim Clark  
**Company Secretary**

## **Chairman's Address**

The period since late October has been a busy, but exciting time for RightCrowd. In late October we announced the predominantly script acquisition of Offsite Vision Holdings Inc (**Offsite**), based in New York, USA. Offsite's solutions extended our product offering beyond checking people security & compliance at the door.

We outlined the Offsite product capability at the AGM in mid-November and also gave an update on the market in which we operate and our expectations for FY19.

In late November we announced the signing of an agreement for the script acquisition of Ticto NV (**Ticto**), based in Belgium. Ticto's wearable security product solutions further extend our security capability to assist an organization to ensure that once a person gains access to a premises, they are authorized to be in the specific location they place themselves in. Completion of this acquisition is subject to shareholder approval today.

In early December 2018 the Company completed a capital raise of approximately \$4.5m in a challenging market. We are grateful to our continuing and new shareholders for their continued support of RightCrowd.

Finally, in December 2018 we also announced the signing of a large software sales and implementation contact in the South American market.

Today's meeting reflects that activity - we are seeking your approval for the various share issues referred to earlier, we are seeking your approval for the acquisition of Ticto, and we are seeking to reinstate our capacity to issue further shares should the Board believe it is in the best interests of the Company to do so.
