

Improving Security Management, Enhancing Productivity

RightCrowd Simplified Access Provisioning

Designed to automate and secure the process of requesting and approving physical access

Could your organization benefit from a streamlined and automated access request process? For many organizations, the benefits of automation remain largely untapped in physical security administration.

RightCrowd automates and secures the process of requesting and approving access requests. When a request is created, a workflow is automatically initiated requesting approval from relevant approvers. Approvers can be customized for specific site areas, including functional managers responsible for a specific area, the requestor's line manager, the security director, and others. When all necessary approvals are received, the RightCrowd system automatically provisions the user with the approved access into your enterprise's physical access control system. The process of provisioning access to areas of your site is fully automated and auditable.

RightCrowd works with Fortune 50 companies simplifying and automating the processes that govern security, safety and compliance.

CONFIGURABLE TO BUSINESS PROCESSES

Unique business and compliance processes can be flexibly configured into the system.

STREAMLINED ACCESS APPROVAL PROCESSES

Automate and track requests for physical access with simplified access level request and approval processes.

TRAINING & CERTIFICATION CHECKED AUTOMATICALLY

Competencies, work permits, licenses or purchase orders can be automatically checked before access is granted.

AUTOMATED PROVISIONING IN ACCESS CONTROL SYSTEM

Reduce the administrative burden and accelerate approval times, add efficiency to security operations.

Solutions

- 1 ACCESS CONTROL SYSTEM CONNECTED**
Leveraging the power of the physical access control system and improve security management by ensuring workers have the access they need for their job.
- 2 CUSTOMIZED ACCESS ADMINISTRATION PROCESSES**
Configure all required approvers, including area approvers, as well as access requiring competency checks according to your business's unique requirements.
- 3 BEST-PRACTICE FEATURE SET**
Automate and track requests for physical access to your site, or areas of your site, with a configurable access request process.
- 4 SINGLE RECORD OF WHO IS ON SITE**
Safely and efficiently manage people on site, without maintaining disparate third party applications.
- 5 CERTIFICATIONS & TRAINING COMPLIANCE**
Automate the granting / denying of access based upon training or certification requirements, licenses or purchase orders.
- 6 VISITOR ACCESS**
RightCrowd solutions also include powerful visitor management functionality providing a single view into access privileges and location data for everyone on site.
- 7 ENHANCE ACCESS MANAGEMENT**
Reduce the administrative burden on security by allowing authorized users to manage and request access.
- 8 COMPLIANTLY DE-PROVISION TERMINATED WORKERS**
Properly manage your workforce ensuring only validated and approved workers have site access.
- 9 REPORTING & AUDITING**
Remove the guesswork around access status with automated reporting functionality.

For many years, some of the world's largest, most demanding enterprises have relied on RightCrowd's software to enhance the security, safety and compliance of their employees, contractors and visitors.
