

Improving Safety Outcomes, Enhancing Productivity

RightCrowd Fatigue Management

Designed to automate the enforcement of fatigue management policies

Could your organization improve safety outcomes through the automated enforcement of fatigue management policies? For many organizations, fatigue is a major contributor to workplace safety incidents, and it can be prevented.

RightCrowd automates the enforcement of fatigue management policies through a deep integration with the access control system. This ensures employees and contractors are only allowed on site if they are in compliance with the policy.

RightCrowd is able to automatically monitor each employee's or contractor's actual time on site based on their card swipe data. RightCrowd's Rules Engine constantly compares this data with this company's fatigue management policies, regarding time on site and mandatory breaks.

If an employee tries to enter site after an insufficient period of time off, RightCrowd can be configured to temporarily disable access for this employee until the minimum break period has been reached.

The RightCrowd Rules Engine is highly configurable, and complex rules involving the total number of hours on site within a 24-hour period or 7-day period can be configured, enabling flexibility with a wide variety of workplace policies and constraints.

RightCrowd works with Fortune 50 companies simplifying and automating the processes that govern security, safety and compliance.

AUTOMATED COMPLEX WORKPLACE POLICIES

Enables the enforcement of a wide variety of workplace rules.

IMPROVED SAFETY, PRODUCTIVITY & REGULATORY COMPLIANCE

Enforcement of the fatigue management policies proven to improve life safety profile.

AUTOMATED FATIGUE AND EXPOSURE MANAGEMENT

Automates the process of locating employees and contractors in breach of policies.

INTEGRATED WITH ACCESS CONTROL SYSTEM

Employees and contractors are unable to enter site unless they comply with the policy.

Solutions

- 1 ACCESS CONTROL SYSTEM CONNECTED**
Access is only granted to workers that have had their minimum break and are in compliance with all configured policies.
