

RightCrowd Visitor Management

Visitor Management for the enterprise

Give your security, facilities and operation teams the tools to manage all visitors and contractors during every stage of their visit by orchestrating their physical and technical access.

Automate your visitor operations

RightCrowd Visitor Management is an enterprise solution that is designed to handle the unique security, security and compliance requirements of large organizations.

Have confidence that only approved visitors and contractors can gain access to your site with automated pre-registration, site inductions, NDAs, contactless kiosks and peripherals.

The solution seamlessly integrates with Physical Access Control and many enterprise systems, managing every type of visitor, at every stage of their visits across your buildings and facilities.

Manage any type of visitor

You handle drop-in visitors, VIPs, group visits, etc. Apply the appropriate (pre-)registration and approval workflows for each visitor type.

Physical Access Control integration

Complete integration with your physical access control system, so you have a profile of every employee, contractor and visitor on site.

Efficient lobby operations

More visitors doesn't mean more staff, with self-service options that automate routine tasks and remove the administration load from reception.

Big group, no problem

Automated group pre-registration, personalized pre-entry compliance processes and exit procedures delivering efficiency and security.

Be a great host

Self-service options allow employees to register visitors with personalized pre-entry compliance processes and be notified when their visitor has arrived.

Safety, security & compliance

It's a balancing act, so you need a comprehensive solution that pushes the right inductions, captures the right details and notifies the right people.

Is it time to upgrade your Visitor Management system?

Discover the leading enterprise visitor management solution trusted by the Fortune 50.

Ensure your visitors are authorized to be in your workplace

Automate site inductions, training requirements and physical access approvals to ensure that every visitor or contractor is safe and authorized to be there.

Personalized visitor access

Reduce administrative burden by allowing your visitors to self-register and badge themselves in.

RightCrowd Visitor Management supports a range of self-service kiosks and peripheral devices, geared to match your unique business and identification requirements.

Manage visitor badges and sign-in

Enhance your physical access control system to provision visitor cards with only the physical access they need.

RightCrowd Visitor Management provides real-time and historical data for people on-site, both past and present.

Visitor self-service and smart pre-registration

Enhance your physical access control system (PACS) by ensuring compliant on-boarding, off-boarding and cardholder access requests.

Remove the guesswork around visitor status and location with a dashboard view of visitors due to arrive, that are on-site and overdue to exit.

All your systems working seamlessly together

Integrate all systems relevant for making good access decisions with RightCrowd. From Physical Access Control, over Active Directory and HR, to Learning Management and ERP, RightCrowd helps connect your systems and automate your processes to improve safety, security and compliance in your organization.

Streamlined lobby operations

Self-service invitations, approvals, inductions and kiosks can reduce the operational and administrative burden on reception staff.

Access control integration

Complete integration with your physical access control system, so you have a single view of every employee, contractor and visitor on site.

Personalized check-in process

Create check-in processes for every type of visitor with health status, NDAs, identification checks & access cards issued.

Enforce host/visitor escort policies

Leverage RightCrowd Presence Control to ensure all visitors are tethered to their host and visible to everyone present.

Secure locally, scale globally

Enact safety, security and compliance policies, while meeting regulatory and language requirements locally.

Visitor reporting and compliance

Flexible visitor and security reporting to demonstrate safety, security and compliance.
