

Securitas to distribute RightCrowd's new Presence Control solution in Belgium and Luxembourg

RightCrowd Limited (ASX:RCW): RightCrowd has announced it has entered into an exclusive agreement with Securitas Belgium to distribute RightCrowd's new, suite of wearables based, Presence Control solutions across Belgium and Luxembourg. The underlying technology was developed by recently acquired, Ticto.

Securitas will also adopt RightCrowd Presence Control solutions for its staff and visitors. The solution will be installed in the head office of Securitas Belgium in Neder-Over-Heembeek in the first half of 2019.

RightCrowd security wearables allows staff to immediately assess whether people or objects are authorised or not to be present in a specific room or at a specific event. Where existing security solutions focus on point in time access control, the technology developed by Ticto makes it possible to perform continuous presence control. By making authorisation visible, RightCrowd ensures that people can actively participate in the security process and as such, form a strong additional layer of security.

RightCrowd's technology, patented in the USA and with patents pending in Europe and China, not only eliminates existing issues, such as tailgating (one person opens the door, and others follow without badging in), but also allows new forms of access and presence control to be implemented. This considerably increases the physical security posture of organisations.

Securitas is a global security industry leader and is constantly looking for new technology to improve the service it offers to its customers. The company has a long history offering technology and applications such as intelligent cameras, access control and perimeter monitoring. With RightCrowd, the company adds a unique and innovative solution to help ensure that only authorised people are present at certain locations within companies, government buildings or at events.

About RightCrowd®

RightCrowd software transforms the business impact of safety, security and compliance programs. RightCrowd solutions enable organisations to integrate business, operational and security systems, and automate the management of critical safety, security and compliance processes.

Founded in 2004, RightCrowd has spent 14 years working with the best of the best in the physical security industry, in deep research and development. RightCrowd is successfully deployed in large global organisations, including Fortune 50 and ASX 10 companies.

"As a specialist in this field, Securitas is the ideal partner for us. Securitas has a strong reputation in securing large companies and governments, and is also investing heavily in technological innovation to make their security solutions more efficient and cost-effective." said Peter Hill, CEO of RightCrowd. "We are therefore delighted that Securitas has decided to also use our solution internally. It demonstrates the strength and unique character of our solution. By making authorisation visible, everyone can contribute to a safe working environment."

"Securitas uses technology to work more efficiently and to optimise its services. The RightCrowd security wearables help to achieve this. We continue to focus on a combination of people, technology and knowledge. People are indispensable in a proactive safety policy. An eye for detail, detecting nervousness and considering the whole are human competences that technology can never completely replace," said Dirk Peeters, Business Unit Director Technology Securitas Belgium.
