

RightCrowd® Announces \$2 million Consulting Contract with Multi-National Client

RightCrowd Limited (ASX:RCW): RightCrowd today announced it has signed a consulting services contract with an existing multi-national client. The client has a global RightCrowd deployment and this agreement to extend the services activity is focused on driving further business benefits from the client's investment in the software.

RightCrowd is an enabler of the client's large-scale digital transformation of its security processes. The client will be engaging a dedicated RightCrowd services team to streamline and maintain physical security processes to further enhance one of the world's leading security operations. The consulting services revenue for this is approximately \$2 million and the project work is expected to be completed within this financial year.

In the same manner as most of its customers, this client has a contractual commitment from RightCrowd that it will not publically release identifiable information around the solution. This is primarily due to the part that RightCrowd software plays in managing clients' security processes.
